

## EZ PAPER BASKET

### SUPPLIES & TOOLS

- 12" x 12" Cardstock – solid or printed
- Score Board #30195075 or Ruler and pencil
- 1/4" Hole Punch #77178558
- 24" of 3/8" Ribbon
- **Optional:** paper scraps for embellishment and double stick tape

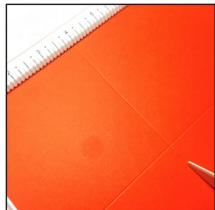

### INSTRUCTIONS

1. Place the cardstock with the right side down on the Score Board. For double sided prints, choose the side you want on the outside of the basket as the right side.

Score the cardstock at the 4" and 8" points

**NOTE:** Measure and mark with a ruler and pencil if you are not using a score board.

2. Rotate the cardstock one turn and again score at the 4" and 8" marks. You should end up with nine 4" squares. Fold and crease at the scored lines.

3. At each of the four corner boxes, fold diagonally from the outer corner in and crease well.

4. Use the 1/4" hole punch and make a hole at each of the four corner tip points for threading the ribbon.

5. Fold the corners in on the diagonal center lines. The corner tips should meet at the center, forming the basket. Thread ribbon through the four holes and tie into a bow to hold the basket together.

6. Fill with treats! You can add a larger bow, too.

7. If you use solid orange cardstock, use black cardstock to make jack o' lantern face details and tape in place.
