## KEIKIKRAFT Sunflower Mason Jar

### SUPPLIES

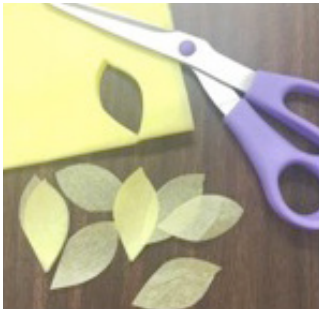

- Quart Mason Jar or other glass container/vase
- Tissue Paper = Yellow, Brown, Green, Light Green
- Mod Podge or similar decoupage sealer
- Clear Acrylic Varnish

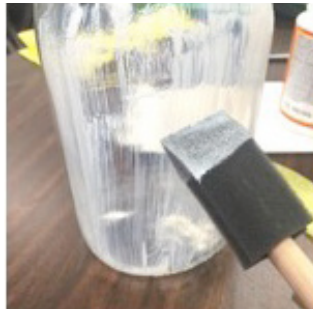

### TOOLS

- 1 in. Sponge Brush
- Scissors
- OPTIONAL: battery operated T-Light or candle

### INSTRUCTIONS

1. Take a sheet of the yellow tissue paper and cut out petal shapes, about 1 in. long.

2. Remove the jar lid. Coat one side of the Mason jar with the Mod Podge.

3. Leaving an opening in the middle, place the petals on the jar to make a sunflower. Add more layers of petals until you are happy.

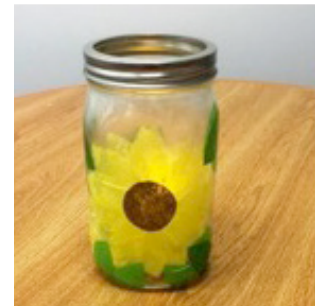

4. From the brown tissue paper, cut out a circle to cover the opening of the sunflower petals. Place the circle on the jar.

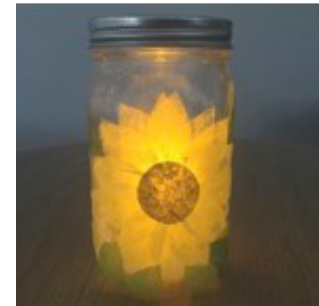

5. Take a sheet of each green tissue paper. Cut out petal shapes for the leaves.

6. Brush on more Mod Podge as needed and place leaves by the flower. You can overlap tissue paper pieces for a nice effect.

7. When you have finished adding flowers and leaves, coat the jar with a clear varnish and let dry. Screw just the jar lid back on.

8. If you leave off the center of the lid, you can use as a vase or storage container. Or add a battery operated T-Light or candle inside for a fun decoration.
