- Mod Podge Glue - Gloss #301448550
- Scissors
- Pen
- Black Sharpie Marker
- Flat Medium-wide Brush or Foam Brush

*Let's get started!*

### INSTRUCTIONS

1. Take your wood coaster and place it on the cardstock. Using a pen, closely trace a circle around the edge of the coaster. Cut out the traced circle from the cardstock.

2. Place your wood coaster on the cork sheet. Closely trace a circle around the edge of the coaster. Cut out the traced circle from the cork sheet.

Both cardstock circle and cork circle should match your wood coaster.

Set both circle pieces aside.

3. Using the black Sharpie marker, give the wooden coaster a wonderful dark edging by coloring in the sides.

4. Using a flat or foam brush, apply Mod Podge Glue to the flat surface of the coaster, and be sure to cover all the edges of your coaster. Place your cardstock circle on the flat surface of the coaster and press flat, making sure there are no bubbles or wrinkles.

Apply a light layer of Mod Podge to the cardstock and let dry.

5. When Mod Podge is dry to the touch, add your chosen sticker to the coaster. Apply another coat of Mod Podge and let dry.

6. On the opposite side of your coaster apply a heavier coat of Mod Podge to the surface. Place and center the cork circle on your coaster and gently press to adhere. Let dry.

*Wrap your coaster for a great Father's Day gift, or any occasion!*
