

12) Take string A and cross through bead 55 on the tube. Take string B and cross through bead 55 on the tube. The beaded row is now joined to the tube to form the fourth star point. Add 3 beads to string B.

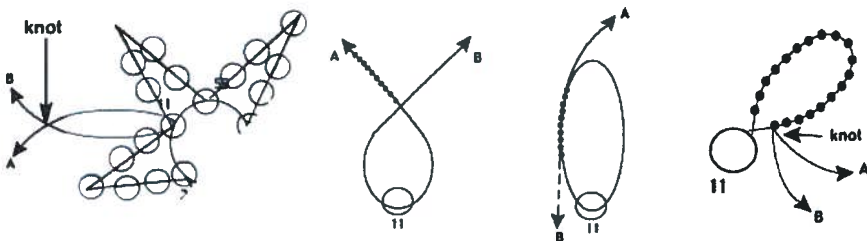

13) Add 2 beads to string A and cross through the last bead on string B. Add 2 beads to string A and add 2 beads to string B. Take string A and cross through bead 11 on the tube. Take string B and cross through bead 11 on the tube.

14) The beaded row is now joined to the tube forming the fifth and last star point.

15) Finishing-- Knot strings A & B together securely. String 20 seed beads onto string A. Take string B and cross through all 20 seed beads. Knot strings A & B securely. Slip the loose string ends into a few more beads and cut off the excess strings to hide ends. Hang from seed bead loop as is or attach a lanyard hook.

Instructions for the Beaded Hoku

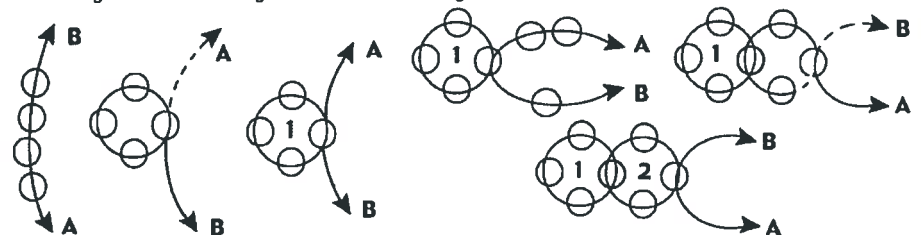

Supplies:

- 60 – 4mm facet Beads, your color choice
- 36" of nylon filament #7718 4721
- 20 – seed beads, color coordinate
- optional: lanyard hook #7740 3501

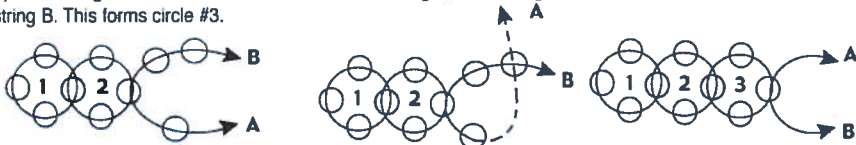

Directions:

Note: You will be working with one length of nylon filament string. The beading will start in the middle of the string and the 2 loose ends will be separated and referred to as the **A** string and **B** string. Generally, after each step, the **A** and **B** strings will be coming out from opposite ends of the same bead.

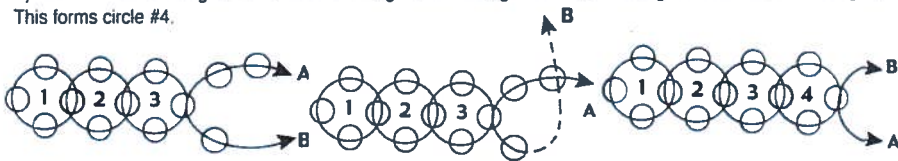

1) String 4 beads onto the nylon filament. Take string A and cross through the last bead. Strings A & B will be coming out from opposite ends of the bead, forming circle #1. Add 2 beads to string A. Add 1 bead to string B. Take string B and cross through the last bead on string A. This forms circle #2

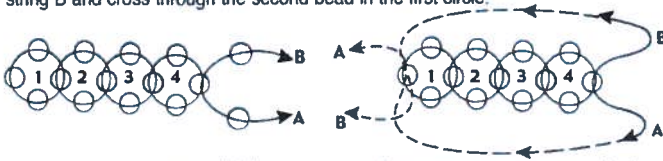

2) Take string B and add 2 beads. Add 1 bead to string A. Take string A and cross through the last bead on string B. This forms circle #3.

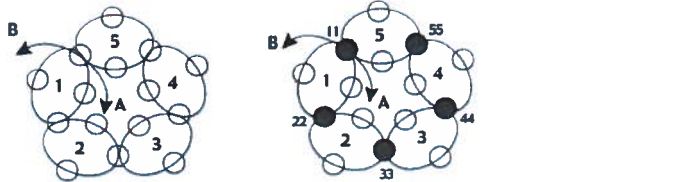

3) Add 2 beads to string A. Add 1 bead to string B. Take string B and cross through the last bead on string A. This forms circle #4.

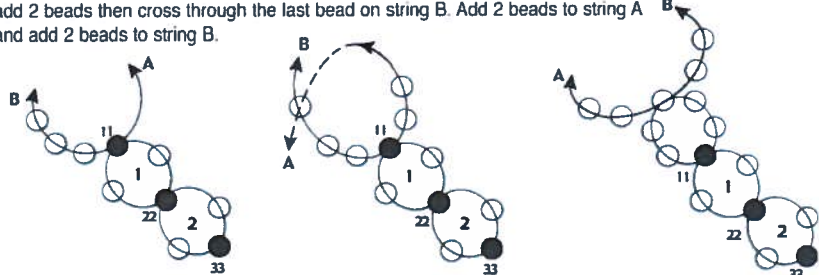

4) Add 1 bead to string A. Add 1 bead to string B. Take string A and cross through the second bead in the first circle. Take string B and cross through the second bead in the first circle.

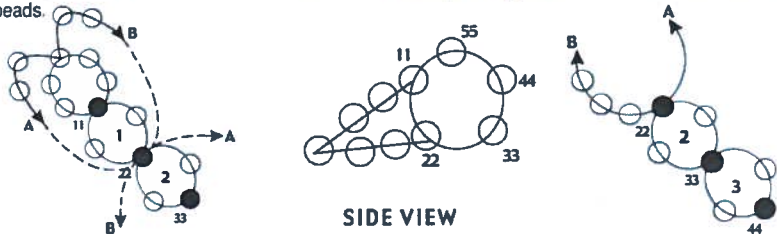

5) The two ends of the row of beads will join together, forming a beaded tube. Your design is now becoming dimensional. Refer to the diagram above for the following steps. You will be working with beads labeled as 11-55 on the beaded tube. (Note: the bead labeled as 11 is the second bead of circle #1).

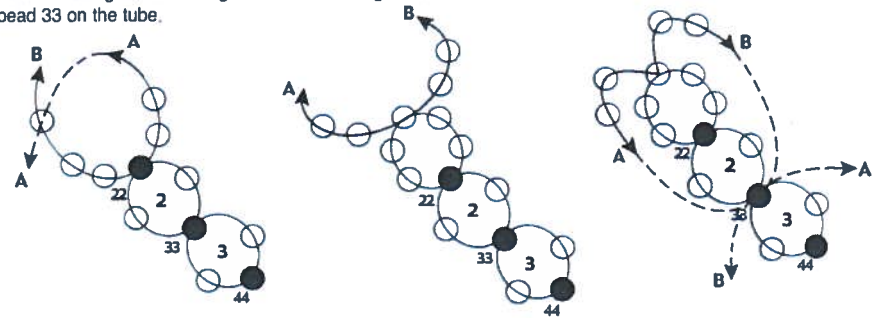

6) With strings A & B coming out from opposite ends of bead 11, add 3 beads to string B. Take string A and add 2 beads then cross through the last bead on string B. Add 2 beads to string A and add 2 beads to string B.

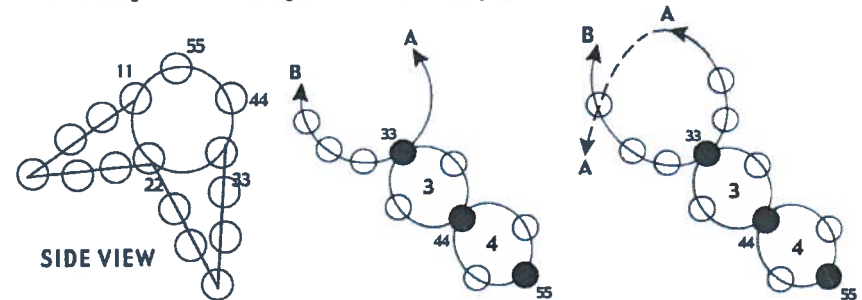

7) Take string A and cross through bead 22 on the beaded tube. Take string B and cross through bead 22 on beaded tube. The beaded row is now joined to the beaded tube, forming the first star point. Take string B and add 3 beads.

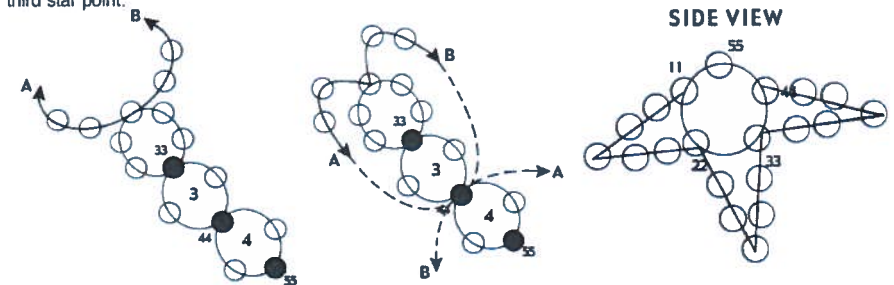

8) Add 2 beads to string A and cross through the last bead on string B. Add 2 beads to string A and add 2 beads to string B. Take string A and cross through bead 33 on the tube. Take string B and cross through bead 33 on the tube.

9) The beaded row is now joined to the beaded tube to form star point #2. Take string B and add 3 beads. Add 2 beads to string A and cross through the last bead on string B.

10) Add 2 beads to string A and 2 beads to string B. Take string A and cross through bead 44 on the tube. Take string B and cross through bead 44 on the tube. The beaded row is now joined to the tube to form the third star point.

11) Take string B and add 3 beads. Add 2 beads to string A and cross through the last bead on string B. Add 2 beads to string A and add 2 beads to string B.
